SUMMARY

Data engineer and data scientist who ships to production. Builds and maintains ETL pipelines at ExxonMobil (Python, SQL, Azure) and works hands-on with ML — from deep learning and NLP to reinforcement learning and full-stack, deployed projects. Seeking AI / ML Engineer roles.

EXPERIENCE

Data Engineering Intern – ExxonMobil

April 2025 – Present · Buenos Aires, Argentina

- Build and maintain production ETL pipelines with **Python, SQL, and Azure**, integrating production, sensor, and operational field data into centralized analytics environments.
- Deliver clean, structured datasets to the business analytics team, enabling faster and more reliable daily operational decisions.

Assistant Professor (Teaching Assistant) – Pontifical Catholic University of Argentina (UCA)

August 2025 – Present · Buenos Aires, Argentina

- Teach **Numerical Methods** (2025) and **Introduction to Data Engineering** (2026), leading practical lab sessions for ~15 engineering students.
- Cover numerical algorithms (root-finding, interpolation, integration, ODEs) and data engineering foundations, reinforcing programming best practices and analytical reasoning.

iXp Intern, Finance Operations – SAP

March 2024 – August 2024 · Buenos Aires, Argentina

- Supported finance operations processes and data analysis within a global enterprise software environment.

PROJECTS

- **Competitive Pokémon RL Agents** — Reinforcement-learning bots that play Pokémon on Pokémon Showdown via **poke-env**, comparing policies from simple heuristics to **AlphaZero-style MCTS** with trained checkpoints. Built with **PyTorch**, **Stable-Baselines3**, **Gymnasium**, and **Docker**. (github.com/Marcofer14/Labo3)
- **Truco Stats** — Full-stack stats platform (live) for a card-game group: **FastAPI** backend, **MongoDB** with ACID transactions, **Redis** for leaderboard and cached materialized views, deployed on **Render** with **GitHub Actions CI**. (github.com/Marcofer14/truco-stats)

TECHNICAL SKILLS

Languages: Python (advanced), SQL (advanced), Scala, MATLAB, R

AI / ML: Deep Learning, NLP, Reinforcement Learning, Time Series, Statistical Modeling

Libraries & Frameworks: PyTorch, TensorFlow, scikit-learn, Stable-Baselines3, Gymnasium, FastAPI, pandas, NumPy

Data & Cloud: Azure, AWS, Databricks, MongoDB, Redis, ETL Pipelines, Docker, Git, CI/CD; REST APIs, Airflow, Snowflake, Neo4j (basic)

Languages (spoken): Spanish (native), English (C2)

EDUCATION

B.Sc. in Data Science – Pontifical Catholic University of Argentina (UCA) · Expected 2026

Relevant coursework: Statistics, Calculus, Artificial Intelligence, Machine Learning, Databases, Data Processing, Numerical Methods.

CERTIFICATIONS

AWS Academy Graduate – AWS Academy Data Engineering (Amazon Web Services, 2024)

LEADERSHIP & VOLUNTEERING

Crew Leader – TECHO · 2019–2022

- Directed on-site construction of emergency housing, managing teams of 8–10 volunteers per build.
